

## iENGINEERING Technology Park

The impetus for technology driven industrial revolution in Pakistan! The nexus of innovation and a catalyst for success.

We are dedicated to advancing innovation by using cutting-edge technologies to create new opportunities for economic development.

### Introducing Technology Park

A technology park is a hub designed to foster innovation, collaboration, and economic growth. It provides businesses with state-of-the-art infrastructure, resources, and support to drive technological advancements. By creating a vibrant ecosystem for research, development, and entrepreneurship, technology parks play a pivotal role in empowering industries, nurturing talent, and boosting regional and global competitiveness. A park can boost the growth of any business owner to scale their capacity and increase the sophistication of their product line. This empowers them to explore multiple avenues.

### Purpose of iENGINEERING Technology Park

iENGINEERING Technology Park is to fulfill the need for a central hub that fuels technological progress and industrial development. It provides businesses with the tools and support to turn innovative ideas into reality, driving economic growth, and global competitiveness. By fostering collaboration and offering access to advanced resources, expert guidance, and a thriving ecosystem, the park empowers industries to grow faster and operate smarter. This initiative positions Pakistan as a strong contender in the global tech arena, paving the way for sustainable and impactful economic transformation.

### Developing the iENGINEERING Technology Park— Our Game Plan

iENGINEERING Technology Park's game plan focuses on driving innovation, fostering collaboration, and enabling industrial growth. Leveraging over 25 years of expertise, the Park offers strategic guidance, cutting-edge IT infrastructure, and operational support to empower businesses. With a vision to position Pakistan as a global technology leader, it nurtures a dynamic ecosystem where enterprises can scale effectively, address real-world challenges, and innovate sustainably. Through a blend of mentorship and resources, the Park catalyzes transformative solutions and economic progress.

# Presenting the model technology park. A one-of-a-kind, all-encompassing special purpose endeavor

iENGINEERING Technology Park is the best-in-class innovative ecosystem for entities to set up their businesses by providing premier facilities and utilities.

This initiative will be a pioneer venture in establishing a creative space for businesses from all walks of life, to facilitate their operational and technical needs.

## Boosting Startup Growth and Trajectory

Empowering startups to scale their ideas and address real-world challenges in a supportive ecosystem to boost growth.

## Strategic Advisory Services

Strategic advisory services for the campus—including recommendations for effective business financial structures.

## Maker Labs: Innovate and Co-Create

Providing facilities for prototyping, transforming ideas into reality. This collaborative space invites you to co-create your idea.

## Ecosystem Driven by Innovation

Offering businesses the perfect opportunity to boost capacity and drive industrial growth. Being in an environment where innovation is put on the forefront.

## Value-Added Services

The park is offering exclusive services to businesses to establish and effectively sustain their businesses in Pakistan. These services will aid in running operational activities.

## Human Resources

Finding, screening, recruiting, and training job applicants, as well as administering employee-benefit programs for the zone enterprises.

## Corporate Law/Legal

Services include regulating the rights and obligations involved with the business activities of a corporation—including formation, ownership, O&M.

## Accounting/Tax/Audit

Assistance in preparations of tax returns, tracing expenses and revenues, auditing, producing financial records and consultations.

## International Liaison

Assistance in building and maintaining mutually beneficial relationships and facilitating communications. This includes international exposure.
